4 economic campuses to bring together strategic sectors

Francazal

Campus for innovative and low-carbon mobility

Land and air mobility

A breeding ground for technological innovation players based on three clusters: energy, experimentation, and industry.

Aerospace

An innovation campus for aerospace and embedded systems

Aerospace

These fields of activity include embedded systems, earth and ocean observation, and materials and energy sciences.

Oncopole

A research campus for the health of the future

Health of the future

Accelerating the development and transformation of academic and scientific strengths (oncology, gerontology, infectiology) into industrial and economic development in the field of medicine of the future (bioproduction).

Grand Matabiau

Campus of digital innovation, artificial intelligence, and cyber security

With 200 researchers from 33 laboratories

The Interdisciplinary Institute and Artificial Intelligence (ANITI) is one of the world leaders in AI, particularly in its applications in health, environment, and transport (autonomous vehicle).

A lively, warm and festive city

- **1,000+ welcoming** and generous restaurant.
- **100+ sporting events** and festivals a year.
- **2,000 hours of sunshine** on average every year.
